# Release Notes

## BaseDrum Collaborate 2.0.0.0

### New features

- A new Progress Visualizer in Team Details will display past, current and future phases with optional date checkpoints. Configurable from Tahoe Administration.
- Archive a project through Team Details. An archived project has all edit rights removed except for the owners.
- Add additional time progression columns to the same project in the Gantt view.
- Our Help Portal now has its first video guides for BaseDrum Collaborate.

### Improved functionality

- Adding column descriptions in the project list will now display a small info label next to the associated field when creating a new team.
- A new setting in Tahoe Administration to add custom images to the project list's choice fields.
- In Tahoe Administration's left-hand sidebar there is a new tab "Reports" that lists orphaned teams.

### Bug fixes

- Fixed a bug where creating a new team with only one available template would open the panel on the wrong page.
