Release Notes

BaseDrum Communicate 1.10.0.0

NEW FEATURES

Tahoe Administration

- Complete redesign of the BaseDrum Communicate page in Tahoe Administration. This allows administrators to manage the instance settings, megamenu, tools and important messages in one place.
- Create and manage Mega menu sites or terms in a new interface.
  Administrators can now create new sites or terms directly from mega menu page in Tahoe Administration. This includes:
    - Selecting a site template from SharePoint's gallery or from your organization
    - Managing site permissions for sites included in the Mega menu
    - Moving sites/terms within the Mega menu structure using Drag and drop
    - Find sites using a built in search function
    - Editing Mega menu item properties easily within a panel, for example changing links or icons
- New interface for displaying and managing Tools and Important Messages.
- Mega menu cogwheel links now link to their respective page in Tahoe Administration

KPI Counter

- Now supports a larger "Title" field to display text above the KPI values.
- Additional number formatting styles to show the max value and even the percentage of the max value.
- For the bar, arc and circle styles you can now turn on progress colors that smoothly transitions the color of the progress animation from red to yellow to green. There is also an option to flip the colors (start from green) as well as change the thresholds for when the colors shift.
- Now supports background images for the card style.

IMPROVEMENTS

Tahoe Administration

- Instance settings are now savable immediately from within the settings panel. No need to first edit, then close, then press save.
- Instance settings are now savable immediately from within the settings panel. No need to first edit, then close, then press save.

FIXED

Mega Menu

- The links now use the darkest version of the theme colors to not appear too light with some SharePoint themes.
- Fixed text appearance not being consistent on the BaseDrum Communicate root site compared to other sites.
- Fixed trunk (top) level terms staying as links after removing the link.
