Release Notes - InSight Improve 1.3

NEW FEATURES

- **New case types**
  Improvements and Observations have been added as new case types with their own steps, forms and registration buttons.
- **Create new case types from an audit**
  You can now create Improvements and Observations as well directly from an audit.
- **Reopen closed cases**
  Administrators can now reopen closed cases and move them back to the previous step.
- **InSight Improve included in the Administration portal**
  Administrative functionality for InSight Improve has been added to the Tahoe Administration portal.

IMPROVEMENTS

- Auditors can now use English and Swedish translations for terms in the Taxonomy Term Store.
- The Audit calendar can now be configured to show status of other case types.
- Each case type now has separate categories.
- Attachments are now as standard opened in a new browser tab.
- Light dismiss added to panels.

FIXED

- Fixed expand/collapse functionality in Taxonomy Picker.
- Fixed missing colon where missing for fields when in read only mode.
- When registering new cases, attachments are now saved to the case after the user clicks on the register button.
- Fixed issue for register button not shown when user navigates between Insight Improve instances.
